	RAL 9016 Traffic White

Sika Industrial Flooring's color selections are available in epoxy and urethane color additives. Because of the limitations of process color printing, the color samples contained herein are close approximations of actual colors and should not be relied upon for true color. Colors show approximate tone without any texture. Final color matching should be made with an actual sample of the product, color and texture to be used. Gloss level will vary depending on product used. Custom colors are available. Minimum quantities, adequate lead time and up-charges may apply. For use with compatible Sikafloor® products only. Please consult Sika Industrial Flooring for further information and pricing.

NOTE: Sika offers Epoxy Color Additive Packs and In Pail Tinted product for the above colors. Due to the difference in technology, the application of Prepigmented Epoxy Resin (i.e. factory tinted) alongside Field Pigmented Resin (i.e. clear resin mixed with colorpacks on site) may result in color differences. Color uniformity can not be completely guaranteed from batch to batch (numbered). Beware when using Sikafloor products to draw from inventory in batch number sequences. Do not mix batch numbers in a single floor area.
